

Mallinckrodt to Present Data on Terlipressin at the 2025 American Association for the Study of Liver Diseases (AASLD) Annual Meeting

October 31, 2025

– Four poster presentations, including one AASLD Poster of Distinction, will highlight research in hepatorenal syndrome –

DUBLIN, Oct. 31, 2025 /PRNewswire/ -- [Mallinckrodt plc](#), a global specialty pharmaceutical company, today announced the presentation of four posters in patients with hepatorenal syndrome (HRS), including a Poster of Distinction, at [The Liver Meeting](#), taking place in Washington, D.C., from November 7-11, 2025.

TERLIVAZ® (terlipressin) for injection is the first and only FDA-approved product indicated to improve kidney function in adults with HRS with rapid reduction in kidney function,¹ also known as HRS-acute kidney injury (AKI),² an acute and life-threatening condition requiring hospitalization.³ HRS is estimated to affect more than 60,000 Americans annually, approximately 0.01% of the U.S. population,⁴ making it a rare condition; and rates of HRS hospitalizations are increasing.⁵

Please see Limitation of Use and Important Safety Information, including Boxed Warning, below.

"We are pleased to share the findings of four analyses, including a Poster of Distinction," said **Christopher White, M.D., M.S.P.H., Senior Director, Hepatology Lead, Clinical Development and Medical Affairs, Mallinckrodt**. "Thank you to the investigators, study teams, and patients who participated in all of these studies and analyses that were conducted. It is because of you that HRS-AKI patients and their physicians now have more information to help support their understanding of this complex disease state."

These analyses were sponsored by Mallinckrodt Pharmaceuticals. Presentation details can be found below:

Session Title: Portal Hypertension and Other Complications of Cirrhosis

Session Date and Time: Saturday, November 8, 2025; 8:00 a.m. – 5:00 p.m. ET

- [AASLD Poster of Distinction, Poster #2285](#)
 - **Presenter:** Kavish R. Patidar, DO
- [Poster #2401](#)
 - **Presenter:** A. Sidney Barritt IV, MD
- [Poster #2315](#)
 - **Presenter:** R. Todd Frederick, MD
- [Poster #2380](#)
 - **Presenter:** Xingyue Huang, PhD

INDICATION AND LIMITATION OF USE

TERLIVAZ is indicated to improve kidney function in adults with hepatorenal syndrome with rapid reduction in kidney function.

- Patients with a serum creatinine >5 mg/dL are unlikely to experience benefit.

IMPORTANT SAFETY INFORMATION

WARNING: SERIOUS OR FATAL RESPIRATORY FAILURE

- TERLIVAZ may cause serious or fatal respiratory failure. Patients with volume overload or with acute-on-chronic liver failure (ACLF) Grade 3 are at increased risk. Assess oxygenation saturation (e.g., SpO₂) before initiating TERLIVAZ.
- Do not initiate TERLIVAZ in patients experiencing hypoxia (e.g., SpO₂ <90%) until oxygenation levels improve. Monitor patients for hypoxia using continuous pulse oximetry during treatment and discontinue TERLIVAZ if SpO₂ decreases below 90%.

Contraindications

TERLIVAZ is contraindicated:

- In patients experiencing hypoxia or worsening respiratory symptoms.
- In patients with ongoing coronary, peripheral, or mesenteric ischemia.

Warnings and Precautions

- **Serious or Fatal Respiratory Failure:** Obtain baseline oxygen saturation and do not initiate TERLIVAZ in hypoxic patients. Monitor patients for changes in respiratory status using continuous pulse oximetry and regular clinical assessments. Discontinue TERLIVAZ in patients experiencing hypoxia or increased respiratory symptoms.

Manage intravascular volume overload by reducing or discontinuing the administration of albumin and/or other fluids and through judicious use of diuretics. Temporarily interrupt, reduce, or discontinue TERLIVAZ treatment until patient volume status improves. Avoid use in patients with ACLF Grade 3 because they are at significant risk for respiratory failure.

- **Ineligibility for Liver Transplant:** TERLIVAZ-related adverse reactions (respiratory failure, ischemia) may make a patient ineligible for liver transplantation, if listed. For patients with high prioritization for liver transplantation (e.g., MELD \geq 35), the benefits of TERLIVAZ may not outweigh its risks.
- **Ischemic Events:** TERLIVAZ may cause cardiac, cerebrovascular, peripheral, or mesenteric ischemia. Avoid use of TERLIVAZ in patients with a history of severe cardiovascular conditions or cerebrovascular or ischemic disease. Discontinue TERLIVAZ in patients who experience signs or symptoms suggestive of ischemic adverse reactions.
- **Embryo-Fetal Toxicity:** TERLIVAZ may cause fetal harm when administered to a pregnant woman. If TERLIVAZ is used during pregnancy, the patient should be informed of the potential risk to the fetus.

Adverse Reactions

- The most common adverse reactions (\geq 10%) include abdominal pain, nausea, respiratory failure, diarrhea, and dyspnea.

ABOUT HEPATORENAL SYNDROME (HRS)

Hepatorenal syndrome (HRS) is a life-threatening condition that occurs in people with advanced liver disease.³ HRS is classified into two distinct types – a rapidly progressive type that leads to renal failure where patients are typically hospitalized for their care (HRS-acute kidney injury (AKI)) and a more chronic type that progresses slowly over weeks to months (HRS-chronic kidney disease (CKD)).^{2,3} HRS is estimated to affect more than 60,000 Americans annually, approximately 0.01% of the U.S. population,⁴ making it a rare condition; and rates of HRS hospitalizations are increasing.³ If left untreated, HRS-AKI has a median survival time of less than two weeks and greater than 80% mortality at three months.²

ABOUT MALLINCKRODT

Mallinckrodt is dedicated to enhancing lives by providing therapeutics that strive to address unmet patient needs, and is a world-class manufacturer of high-quality generics, sterile injectables, and active pharmaceutical ingredients.

Our company consists of multiple wholly owned subsidiaries that operate in two businesses. Our Brands business is focused on autoimmune and rare diseases in areas including endocrinology, gastroenterology, hepatology, neonatal respiratory critical care, nephrology, neurology, pulmonology, ophthalmology, orthopedics, rheumatology, and urology. Our Par Health business includes generic drugs, sterile injectables, and active pharmaceutical ingredients. To learn more, visit www.MNK-Endo.com.

CAUTIONARY STATEMENTS RELATED TO FORWARD-LOOKING STATEMENTS

This release contains forward-looking statements, including with regard to TERLIVAZ[®], its potential to improve health and treatment outcomes, and its potential impact on patients. The statements are based on assumptions about many important factors, including the following, which could cause actual results to differ materially from those in the forward-looking statements: the effects of Mallinckrodt's recent emergence from bankruptcy; satisfaction of, and compliance with, regulatory and other requirements; actions of regulatory bodies and other governmental authorities; changes in laws and regulations; changes in market demand; issues with product quality, manufacturing or supply, or patient safety issues or adverse side effects or adverse reactions associated with TERLIVAZ; and other risks identified and described in more detail in the "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections of Mallinckrodt's most recent Annual Report on Form 10-K, subsequent Quarterly Reports on Form 10-Q, and other filings with the Securities and Exchange Commission (SEC), all of which are available on the SEC's website (www.SEC.gov) and Mallinckrodt's website (www.MNK-Endo.com). The forward-looking statements made herein speak only as of the date hereof and Mallinckrodt does not assume any obligation to update or revise any forward-looking statement, whether as a result of new information, future events and developments or otherwise, except as required by law.
